## An Introduction to Human Genetics

Some Very Useful Numbers

A Genome Owner's Starter Pack

Human Genome Variation and Why It Matters

DNA Sequencing

Mutation: The Ultimate Source of Genetic Variation

## Population Genetics: The Forces That Shape Genetic Variation

Genetic Drift

More on Genetic Drift: The Coalescent

Linkage, Recombination, and LD

Genetic Drift in Structured Populations

Natural Selection I: Background and Models

Natural Selection II: Positive Selection and Adaptation

Natural Selection III: Genome-Wide Extent of Selection
